Summary

A passionate IT enthusiast with hands-on experience in Consulting and Enterprise Architecture. Recently transitioned to a full-time after a high-impact internship, where I delivered client-facing solutions for 4+ national and multinational clients, collaborated with 10+ cross-functional team members, and contributed to strategic digital transformation initiatives. I thrive in collaborative environments and am eager to grow through structured learning, leadership exposure, and real-world problem solving in any program.

Experience

ATD Solution – Junior Consultant

Jun 2025 – Present

- Delivered enterprise architecture (EA) initiatives for clients across multiple industries (banking, oil & gas, coal mining), focusing on business-IT alignment and strategic visibility.
- Supported business development activities, including preparation of proposals, proof-of-concepts (POC), and service presentations to potential clients.
- Collaborated with senior consultants in client engagements, contributing to analysis, documentation, and delivery of actionable recommendations.

Tech no Phi Agency – Founder & Tech Lead (Self-employed)

Aug 2025 – Present

- Established partnerships with academic and startup stakeholders, expanding client acquisition channels and collaboration opportunities
- Successfully delivered multiple web projects for PT/CV clients, ensuring completion within defined scope and timelines.
- Managed end-to-end agency operations (projects, finance, and internal processes) while maintaining consistent delivery across engagements.

ATD Solution – IT Consultant Intern

Mar – May 2025

- Selected as top-performing intern with 150–200% workload compared to peers; entrusted to directly present EA models and solutions to two client directors.
- Collaborated with senior consultants and cross-functional teams, including international stakeholders, to align technical solutions with business needs.
- Developed 3 end-to-end consulting materials and implemented 10+ tool enhancements based on mentor directives—showcasing technical initiative and product ownership beyond intern expectations.

Project

EA Implementation Indo Tambangraya Megah (ITM) | TOGAF, Archimate

Jan 2026 - present

- Deep drive through ITM's coal mining process to track the connectivity between enterprise components within the organization.
- Creating Application Rationalization & Application Portfolio Management Dashboards to enhance explanation & suggestion for ITM's future plan.

EA Implementation for Pertamina Hulu Rokan (PHR) | TOGAF, Archimate

Oct - Dec 2025

- Piloted PHR Apps to track the connectivity between enterprise components within the organization.

- Provided implementation and development recommendations by utilizing dashboards to support strategic planning and work program evaluation.

Professional Websites | *Next.JS, Supabase* | [Website](#)

Mar 2026 - present

- Developed company profile websites for business branding and digital presence.
- Built web applications to support operational and business processes.

Education

IPB University

Aug 2021 – Mar 2025

Bachelor of Physics

Bogor, Indonesia

- Accumulated 3+ years of organizational experience across various roles, including Physics Student Association and Executive Student.
- First & Fastest Physics Graduate (3.5 years).
- Student Representative in International Assessment (ASIIN) for Physics Department.

Organization

IPB Physics Student Association

Jan – Dec 2024

Chairman

Bogor, Indonesia

- Actively engaged with over 300 students and 5 stakeholders, including the department and alumni network.
- Developed innovative digital programs featuring alumni profiles and undergraduate thesis, achieving monthly engagement of 1,000+ views.
- Directed five large-scale projects involving 50+ volunteers, successfully attracting over 500 participants.
- Fostered community growth and established connections across three or more alumni cohorts, enhancing funding efficiency by 200%.

Training and Workshop

Bangkit Academy Batch 6 – Machine Learning Cohort

Sep – Dec 2024

- Successfully completed the Machine Learning track in Bangkit Academy with mastering over 20 courses within 2 months.
- Earned more than seven international programming certifications, showcasing advanced technical proficiency.
- Led a capstone project team of six members spread across Indonesia, resulting in the development of an innovative mobile application for currency classification with an accuracy exceeding 90%.
- Continuously engaged in over 2 self-initiated projects, applying and expanding knowledge acquired from previous experiences.
